CONDITION OF THE MARKETS

"Bull" Day in Everything Dealt in by the Speculators of the Chicago Board.

Sharp Upturn in Wheat Takes Operators by Surprise-Corn and Oats Higher-Hog Products Also Stronger.

MONEY, STOCKS AND BONDS.

Dullness Growing Denser in Wall Street-Fluctuations Very Insignificant. NEW YORK, July 1 .- Money on call was close, ranging from 3 to 8 per cent., the last loan being made at S, closing offered at 2 per cent.

Prime mercantile paper 5@7 per cent. Sterling exchange quiet and heavy at \$4.8334 for sixty-day bills and \$4.8714 for

The total sales of stocks to-day were 117,-578 shares, including the following: Atchison, 5,570; Delaware, Lackawanna & Western, 8,340; Hocking Valley, 7,510; Louisville & Nashville, 3,166; Northern Pacific pre-ferred, 5,150; Reading, 4,700; St. Paul, 6,910. The stock market of to-day differed from those of the past few days only in its greater degree of dullness, the usual slight fluctuations being in the upward direction.

With the prospects of assured easy money for at least two months and a large amount of funds seeking investment, the inducements to put out short lines are not large, and the trading for the short account is now principally confined to covering operations. London, however, continues to be a buyer to a limited extent. The professionals alone seem to have any active interest in the market, and that is directed to recognize former about the same and the same directed to recouping former short sales. To-day there was a languid interest in New England, Lackawanna, St. Paul and the trusts, with special movements in Pullman, Pacific Mail, Hocking Valley and Edison general electric. The news of ranced to-morrow, and early action upon the dressed beef question is expected on the part of the Central Traffic Association. There was no break in the strong front presented by the market until just toward the close, when Pacific Mail was raided down and almost everything traded in yielded slightly, making the close dull but heavy at insignificant changes from last night's figures as a rule. Pullman lost some more of its last Saturday's sudden rise and Sugar Refineries shaded off slowly in the face of the strength of the general list, while the only sharp advance was in Hocking Valley, which reached 20, or 2 per cent. above its first price, though losing a portion of the improvement toward the close, leaving the gain at only 7s per cent. Pullman is off 134. Pacific Mail 112, and

Railroad bonds were dull, but reflected the stagnation in prices which obtained n the share list very closely, and except final changes are without significance in almost every case. Trading extended to Government bonds were dull and steady. State bonds were dull and firm. Closing

TRADING AT CHICAGO.

Sharp Advance in Wheat-Corn and Oats Higher-Hog Products Stronger. CHICAGO, July 1.-Wheat trading was more active and the feeling developed was stronger, with a material advance in prices. Outside orders were numerous and some foreign buying orders were filled. The movement was attended with some excitement, the sharp turn rather taking operators by surprise. The market opened 12@ 3rc higher than yesterday's closing and steadily advanced with scarcely any fluctuations 214@2120 more, then eased off slightly and closed about 2@214c higher than yesterday. "Shorts" were anxious to cover and there was active buying from this source. The upturn was attributed to reported unfavorable weather in England for the growing crop, cable advices noting continued wet and cold weather, and also to reports of rain in the Northwest and warmer weather there. There was a large trade in the corn market again to-day. and, as on yesterday, it consisted principally in changing July into Septem-ber. The free deliveries on July contracts erested considerable pressure to sell this future on the opening, and first sales were 24c below the closing prices of yesterday. After the early weakness the market manifested a better tone, and a rally of loc followed, and final quotations, compared with yesterday, show a gain of 182 14c. Oats were firmer and a shade higher, outside prices being fairly maintained until the close. Mess pork offerings were moderately free early, and a reduction of 30@ 40c was submitted to. At the decline a better demand prevailed, and prices rallied again 40@50c. but settled back again 15@ De, and closed comparatively steady. Lard vanced .05@.071gc, and the appreciation was fairly well supported. In short ribs a fairly active trade was reported. Prices were advanced .0712@10c, and the appreciation was moderately well supported. The leading futures ranged as follows:

National transit certificates opened at 865sc; closed at 865sc; highest, 87c; lowest, 861sc. CLEVELAND, July 1. — Petroleum quiet; standard white, 110°, 73ec; gasoline, 74°, 9c; gasoline, 86°, 12c; naphtha, 63°, 7c.

NEW YORK, July 1. — Business in dry goods tends toward quiet conditions. There was considerable trade in new goods and in staples, spot transactions being more numerous, if anything, though not large. Special dress styles appear to be a leading feature and these vary in price ac-cording to the quality and width.

NEW YORK, July 1.—Copper quiet; lake, July, 16.50c. Lead dull; domestic, 4.47c. Tin dull and heavy; straits, 20.90c.

NEW YORK, July 1.—Wool quiet; domestic fleece, 35&38c; pulled, 26&34c; Texas, 17&24c.

INDIANAPOLIS MARKETS. A Quiet Day in Trade Circles, with N Fluctuations in Values.

INDIANAPOLIS, July 1. It was practically a half holiday to-day, PHILADELPHIA, July 1.—Flour steadier, with a better inquiry. Wheat—Options quiet and milling grades scarce and quiet; rejected, 72@78c; fair to good milling, 88@93c; prime to choice, 94@97c; No. 2 red, July, 89½@90c; August, 89½@89¾c; September, 89½@90c; October, 89½@90c. Cornquiet out steady; No. 2 mixed, in Twentieth-street elevator, 42½c; No. 2 mixed, July, 41@41¼c; August, 41¼@41¾sc; September, 41¾@42c; October, 42½c. Oats firm with a good local trade demand. Futures firm, and near months advanced ½@¼c; and in trade circles it was very quiet. It is quite likely that a summer dullness will now come over business generally as this month comes in. However, the indications are that trade will reach a larger volume than in July last year, as retail merchants will need a good deal in the way of replenishing broken stocks. In prices to-day there were no important changes. Taken as a whole, there is a healthy tone to the various markets, and matters are mov-ing along unusually smooth. Margins on sales of goods are very satisfactory, and the steadiness to prices is a noticeable feat-ure of the present conditions.

Indianapolis Jobbing Trade.

ver hull, 85c@ \$1; common, 75@ 85c & bu. Wire Worms.

Farm and Fireside.
What to do to clear a field from wire worms with which it is overrun is another of the problems propounded to me by a suffering correspondent. The insect in question is the hard, apparently legless worm which is the larva of one of the common elaters, or spring beetles, so called from the peculiar habit of suddenly throwing themselves several inches, or even feet into the air when placed upon their back. The grubs, or worms, live on all kinds of vegetation, roots, stalks, tubers, bulbs, etc., and in some fields, especially on sod ground, are often very numerous and destructive. Most, if not all, of the insectivorous birds seem to be especially fond of this worm, and eat them for breakfast, dinner and supper, and ever so often between meals, if they can get them. For this reason I would recommend as the first and foremost remedy for the wire worm, to protect these birds and build them houses, and to keep cats and squirrels, and crows, etc., away from their breeding places.
Turn the infested land over frequently with the plow to disturb the worms and bring them to the view of their bird enemies. Poultry also like them for a change. The means often employed in Europe for the disposal of wire-worms, namely, baiting, trapping, gathering and destroying, are worthy of trial with us. Slices of potatoes or turnips are distributed in regular rows over the infested field, and examined regularly every morning by women or children, who gather all the worms found and destroy them. We might try a simpler method, provided, however, that there will

be no likelihood of cattle, horses, sheep, hogs or poultry getting into the field and getting hold of the bait. It is more than probable that sprinkling these pieces of potato or turnip with paris green, in dry mixture or solution, will rid the field as effectually of wire-worms (and of many potato-bugs at the same time) as fresh sods, cabbage-leaves, etc., sprinkled in the same way and scattered over a field will rid it of cut-worms. At least this is worth trying

Civilizing Sheep.

Galen Wilson, in Country Gentleman. A person who habitually keeps his sheer so scary and wild that he cannot call then up to him at any time is unfit to be a shepherd. Such animals never do as well as those which are docile enough to come up those which are docide enough to come up and eat out of the hand. I have seen wild flocks tamed by the aid of a cosset brought up about the house. It will obey when called, and the wild ones will soon learn to follow its lead if they receive kind treatment from the shepherd. In belling it is customary to place the bell on the strongest and wildest. This is a serious mistake. The wildest are frightened first. The others soon learn what rapid tones of the bell indicate, and when they hear such, will scamper off without looking to see if there is really danger. At shearing time once, when the bell was off, I took it and hid behind a stump forty rods away. A few quickly-repeated strokes set the flock in violent motion. If there is a cosset, it is the one to bell, for something more than apparent danger will be required to set it on a run. When one has a flock of wild sheep, it would pay to raise a cosset especially for this purpose.

A Michigan grower says that the practice of thinning fruit-more especially the peach-is very general among the better class of fruit growers in the Michigan lakeshore fruit belt. It is deemed highly profit able, since it improves the size and appearance, and even the flavor, of the remaining specimens; and, if properly done, does not even diminish the quantity, while it saves the exhaustion of the tree in the effort to mature an excessive crop of fruit. The sooner it is done the better after the danger of loss from the dropping of the fruit is past. It is usual to commence with a partial thinning, and to repeat the process later by removing imperfect and insectmarked specimens. The extent to which it should be carried depends upon the vigor of the tree and the condition and cultivation of the soil. A portion of this work is usually accomplished in the process of

Zion's Herald truthfully and pointedly says that in hiring farm hands where there are boys, it would be preferably to bring a man with the smallpox into the family rather than one with defective morals.

To Yearly Subscribers Only.

Aware of the general demand for a hand some and reliable time-keeper at the lowest price consistent with perfection in movement and richness in case, THE WEEKLY JOURNAL has been seeking, for some time, a watch that it could unreservedly recommend to its subscribers as just the one they needed and would be pleased with. It is glad to be able to announce that it has recently found such a watch in the one described in three styles below, and to be able to guarantee it as the best and cheapest watch ever origithe best and cheapest watch ever originated in the country. It has concluded a private arrangement by which it offers below these watches at nearly one-half the price at which they can be procured of any retail dealer. These watches, at these low prices, can be secured by yearly subscribers only to THE WEEKLY JOURNAL.

If you are not a subscriber to THE WEEKLY JOURNAL you must become one, in order to get the advantage of this great offer. Add ONE DOLLAR to the figures given below, and THE WEEKLY JOURNAL will be sent one year, as well as a watch. Every Subscriber Should Own One.

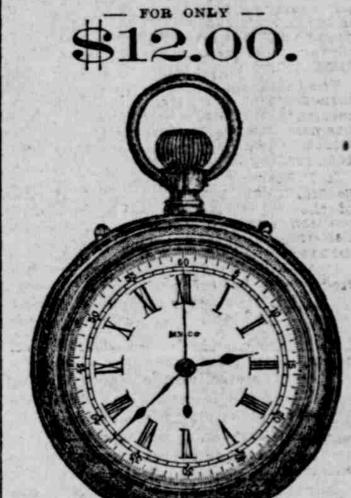

Read the Descriptions Carefully.

Gold-Filled Hunting-Case,

The above is a correct representation of the from case, and the back is even more beautiful, being a fine landscape engraving on the glittering gold. The cases of this watch are warranted for fifteen years, and the movement bears the stamp of the Elgin National Watch Company, which will convince any and all that the watch is good for a life-

A GOLD "FILLED" STOP WATCH.

DESCRIPTION OF GOLD WATCH It is the genuine gold-"filled" or "reinforced" case, and patented, and made only by half a dozen manufacturers, and is the same for use and wear as the solid gold case, and may be so considered and treated. Even the costliest watches on the market now have Even the costliest watches on the market now have them, on account of their greater strength.

With each watch there goes a guarantee by the Manhattan Watch Company to keep it in order for one year free of all charge.

The little post on the left hand stops and starts the watch; the little post on the right hand turns the hands, setting the watch. It need never be opened. It is a ratchet stem-winder, full jeweled balance movement, and as good a time-keeper as any man wants. wants.

The back of this watch is exquisitely engraved by hand.

The every outside outside outside in prove at that its tracks within the care the ten and the carried the property of the prop

Description of SILVER WATCH Only \$7.

The face of this watch is precisely the same as that of the gold watch, and the movement is precisely the same. The difference between the two watches is only in the case. The latter is of oxidized silver, acid eaten, very neat and quaint.

The movement is the quick train, with straight line lever escapement, with a direct-acting hand-set that permits accurate setting, and will not allow the hands to move out of position while setting. In the sweep second movement the second hand is run direct from the movement train, insuring perfect motion, while the dial train and hands are run by a friction pinion from a side center. This gives all the advantages in time-keeping qualities of the most delicately adjusted and expensive movement.

Each watch is put up in a neat box, padded, to carry it safely through the mails. In the box are directions for setting the hands and regulating the watch, with the name of the person at the factory who tested and packed it. If on receipt of the watch it does not regulate or keep time, or is found out of order in any way, it is to be returned to the Manhattan Watch Company, No. 234 Broadway, and it will either be put in perfect condition or a new one sent, PREE OF ALL CHARGE. This guarantee is good for one year, during which the company agrees to keep the watch in perfect running order free of al

The silver case has a direct instead of a ratchet stem-wind, and snap-back instead of a screw-back. The guarantee is the same for both, for the movements are the same.

These WATCHES, in time-keeping, appearance and durability, equal to the best.

The LADIES' ELGIN GOLD FILLED HUNT-The CADLES ELGIN GOLD FILLED HUNT.

ING-CASE WATCH costs \$14.50.

The GOLD-FILLED STOP WATCH costs \$12.

The SILVER STOP WATCH costs \$7.

The GOLD-FILLED STOP WATCH given to sender of 50 subscribers and \$50.

The SILVER STOP WATCH given to sender of 25 subscribers and \$25. 25 subscribers and \$25. As we get the Watches trom New York city, it requires some time for orders to be filled, and parties ordering must be reasonably patient before writing letters of complaint that the goods have not come to hand. Expenses of delivery prepaid. Address
